Front-End Developer

Front-End Developer with more than 10 years of experience in international projects, combining interface design, advanced front-end and back-end development with Node.js, Express and MongoDB. Focused on creating scalable, intuitive and user-centric solutions, I seek to consolidate my career as a Full Stack Developer, integrating front-end and back-end skills with a commitment to innovation and continuous learning.

Skills

Frontend Technologies

`Javascript (ES6)` `React.js` `HTML5` `CSS3` `NPM`
`Jest` `Testing Library` `Webpack` `yarn`

Backend Technologies

`Node.js` `Express.js` `MongoDB` `GraphQL`

Skills

`Git` `Postman` `RestAPI` `Swagger` `Terminal`

Technologies I have worked with

`PHP` `C++` `SQL`

Expertise

Frontend Developer
PROYECTO TRAVELPORT, PASIONA

Actuality Jan.2022

I contributed to the migration of desktop applications to web for one of the world's leading GDS platforms. I implemented front-end solutions with React.js, ES6, HTML5 and CSS3, ensuring quality with Jest and Testing Library. On the back-end I developed microservices using Node.js and GraphQL. We applied agile methodologies such as SAFe and Agile, managing tasks with Jira and Azure DevOps, and using tools such as Git, Webpack, npm and yarn for integration and development.

Full Stack Developer
TAP TAP NETWORKS

May.2021 Feb.2019

Development of solutions to optimize digital advertising campaigns through data analysis and advanced segmentation. I performed front-end development with JavaScript using Backbone and React, and back-end with Node.js, creating REST APIs with Express and MongoDB. Continuous integration with CircleCI and Docker.

Frontend & UI Developer
MIRAI ESPAÑA S.L

Feb.2019 May.2015

Front-end development and layout for hotel companies, using WordPress, Bootstrap and JavaScript. Implemented search engines on external websites and offered technical support and UX improvements to clients.

Front-End / Designer
UNIVERSIDAD INTERNACIONAL DE LA RIOJA - UNIR

Abril 2015 Sept 2014

Design and development of landings and mailings for university advertising campaigns. Creation and layout of pages for the corporate website UNIR.NET using Bootstrap, Sass and Compass.

Front-End Developer
GOWEX

Abril 2013 Junio 2008

Development with HTML5, CSS and JavaScript of WiFi portals for public spaces, transport and cafes in cities such as Paris, Dublin, Dubai, New York, San Francisco and Madrid.

Front-End Designer
OPENFINANCE S.L, IDEUP!, IS CREATIVE STUDIO, TECSHELL, EL PAÍS DIARIO, E-STRATEGIA

Front-end design for several entities, combining brand design, product design, interactive interfaces and animation. I participated in projects focused on usability and user experience (UX).
